Education

College of Engineering and Management, Kolaghat

- **Course :** B.Tech in Information Technology

Duration : 2020 – 2024

CGPA : 8.64 / 10.0

Jara High School

- **Course :** West Bengal Council of Higher Secondary Education

Duration : 2019 – 2020

CGPA : 8.84 / 10.0

Experience

Software Engineer at *Cron Labs Solution Private Limited*

Sept 2025 – Present

- **Optimized** Marico's sales workflow by fixing **Region, ASM, Distributor, Channel, and Brand filtering logic**, improving **data accuracy** and reducing **selection errors**.
- **Architected role-based access control (RBAC)** with **custom user and application-level permissions**, enhancing **system security**.
- **Eliminated surrogate SKU mapping**, dropdown validation, and **browser navigation issues**, improving **data consistency** and **user experience**.
- **Engineered and integrated** processing states, **scheduled-status animations**, and **automated notifications**, improving **system transparency**.
- **Strengthened system stability** by **validating chemist data**, **optimizing outlet selection logic**, and fixing **migration and configuration issues**.
- **Improved code reliability** by enhancing **test coverage**, resolving **merge conflicts**, and maintaining **clean Git workflows**.

Projects

Dev-Tidy – CLI Project Cleanup Tool [🔗](#)

Tech: Node.js, JavaScript, Babel AST, Commander, NPM

- **Built** a Node.js **CLI** tool to detect unused files, dead code, and optimize JavaScript projects.
- **Leveraged** AST-based cross-file analysis using Babel to identify unused variables, functions, and dependencies.
- **Published** the CLI on npm with dry-run, safe deletion, and import optimization.

Wanderlust - An Online Marketplace [🔗](#)

Tech: HTML, CSS, Node.js, Express.js, MongoDB, Bootstrap, REST API

- **Launched** an online marketplace connecting tenants with property owners, increasing visibility by **45%**.
- **Designed** server-side logic and APIs using **Node.js** and **Express.js**, streamlining user requests and reducing response time by **30%**.
- **Secured** user authentication and session management, ensuring reliable access control and protecting user data.

FoodVilla [🔗](#)

Tech: React, Firebase Authentication, Redux, Tailwind CSS, REST API

- **Developed and applied** a **RESTful API** to fetch food items, enabling dynamic menu rendering in the frontend.
- **Integrated Firebase Authentication** with secure login and signup workflows, improving user onboarding and session persistence.

Technical Skills

Languages : Java , Kotlin , JavaScript , Python , PHP , SQL , HTML , CSS

Framework : React , Angular , Node , Django , Express , Bootstrap , Tailwind CSS

Technologies : Gradle , Coroutine , MVVM / MVC / MVP , RESTful APIs , MySQL , Firebase , MongoDB

Tools : Windows , Git , Github , VS-Code , Android Studio , MS – Excel , MS – Word , Power BI

Other Skills : Data Structure & Algorithm , OOPs , System Design , SDLC , Agile Methodology , Unit Testing
